Professional Summary

Seasoned front-end web developer with five years of hands-on experience, specializing in the creation of visually appealing and interactive websites. Proficient in developing responsive user interfaces, handling API calls, and implementing form validation and error handling. Committed to meeting customer needs and delivering effective solutions.

Work Experience

Mid-Level Frontend Web Developer - 24G - Remote 06/2020 to Current

- Revised and upgraded multiple flagship base product spinoffs, ensuring they remained current and aligned with the latest industry standards.
- Enhanced user experience by implementing responsive web design and optimizing website performance.
- Implemented efficient processes for website maintenance, resulting in improved overall functionality and a more user-friendly experience.
- Built custom web applications, addressing specific client requirements and delivering tailored solutions.
- Executed comprehensive usability testing using Playwright, integrating valuable feedback for ongoing enhancements to user interfaces with over 100 created tests.
- Resolved technical issues promptly, ensuring minimal disruption to performance and user satisfaction.
- Provided developer support, creating visually appealing designs that aligned with brand standards.
- Fostered close collaboration with cross-functional teams, including project managers, designers, developers, and quality assurance, consistently meeting project deadlines.
- Developed user-friendly web forms with validation and error handling.
- Constructed multiple micro-sites and KPI dashboards for renowned clients, including Volkswagen and BMW, enhancing their online presence and data visualization capabilities.
- Contributed to company growth by identifying opportunities for improvement in web development processes and technologies, fostering a culture of continuous learning through knowledge sharing.
- Developed comprehensive feature-specific flowcharts, facilitating easy understanding for future team members and expediting onboarding processes.
- Executed complete redesigns of existing websites, resulting in improved navigation, enhanced visuals, and modernized products.
- Implemented TypeScript, establishing a type-safe codebase for reliability and maintainability.

Entry-Level Frontend Web Developer - Self-Employed - Memphis, TN 01/2019 to 05/2020

- Created single-page applications for locals who wanted to advertise their businesses.
- Created full-stack applications to teach others about front-end and back-end web development.
- Used HTML, CSS, SCSS, JavaScript, C#, Node.js, and Java to complete university assignments.
